# Microsoft 365 Managed Services

**Baychester Associates, Inc**  
TECHNOLOGY MADE SIMPLE...

Microsoft 365 (formerly Office 365) offers a robust suite of tools that can transform the way your business operates. But managing this platform requires continuous updates, security oversight, and integration with your existing systems. That's where Baychester Associates comes in. Our Office 365 Managed Services ensure that you're always operating efficiently, securely, and up to date.

## Managed IT Services

### Migrate

Migrating to Microsoft 365 can be a complicated task. BAI has the knowledge and experience to manage all aspects of migration

### Integrate

Microsoft 365 can be integrated with your business processes. Let Baychester configure and integrate the platform to conform to your needs.

### Manage

BAI can manage and monitor the Microsoft 365 ecosystem from end to end. From License and Security to user management and backup.

# THE HIDDEN COST OF DIY M365 MANAGEMENT

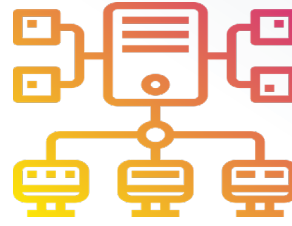

## Security

Without the expertise required, implementing robust security measures becomes a daunting task, significantly increasing the risk of your valuable data becoming susceptible to various cyber threats and potential breaches.

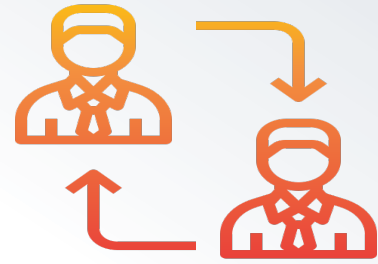

## Licensing

Efficiently managing licenses and avoiding overpayment for unused services can become a significant challenge without the right tools and expert knowledge, potentially leading to unnecessary costs and administrative headaches.

## Scalability

The complexities of scaling, maintaining security, and managing licenses can overwhelm your internal resources, leading to inefficiencies and potential vulnerabilities. Let experts handle the tech so you can focus on your strategic goals.

## User Migration

User migration in a self-managed Microsoft 365 environment can be extremely complex, often causing significant downtime, data integrity issues, and administrative challenges without the right expertise and resources.

- 77% of businesses using Microsoft 365 experience some form of data loss due to accidental deletions, malicious attacks, or overwriting of data.
- Cyberattacks targeting Microsoft 365 increased by 67% year-over-year, with small and medium-sized businesses being the primary target.
- Nearly 80% of data breaches involving Microsoft 365 are due to inadequate configuration or mismanagement of security features like MFA and email filters.
- Compliance mismanagement results in average fines of \$2.4 million annually for affected organizations.

- 85% of Microsoft 365 users have encountered phishing attacks, with 28% reporting compromised accounts.
- 44% of organizations reported that human error in misconfiguring Microsoft 365 settings contributed to security vulnerabilities.
- 42% of businesses using Office 365 fail audits due to insufficient attention to regulatory compliance and lack of proper configurations.
- Businesses managing Office 365 internally report 30% more downtime than those outsourcing management to professionals.

- 60% of companies mistakenly assume that Microsoft 365 provides sufficient data backup and recovery, leaving them vulnerable during outages or cyber incidents.

TECHNOLOGY MADE SIMPLE...

## Licensing

Ensure your Microsoft 365 licenses are perfectly aligned with your business needs. Baychester streamlines license allocation, reduces waste, and ensures you're only paying for what you need.

## Security

Protect your business from cyber threats. Baychester configures Microsoft 365 security settings to meet industry standards, ensuring compliance with regulations like HIPAA, PCI-DSS, and GDPR.

## Support

Experience round-the-clock support for your team. Baychester proactively monitors your Microsoft 365 environment to resolve issues quickly, ensuring minimal disruption and maximum productivity.

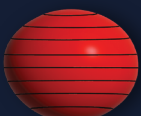

## Updates

Stay ahead with fully updated tools. Baychester handles Microsoft 365 updates and maintenance, so your business always benefits from the latest features and security enhancements.
